

*WHEN THINGS GET ROUGH*

## VINEYARDS SEEDER "BIOSOVY"

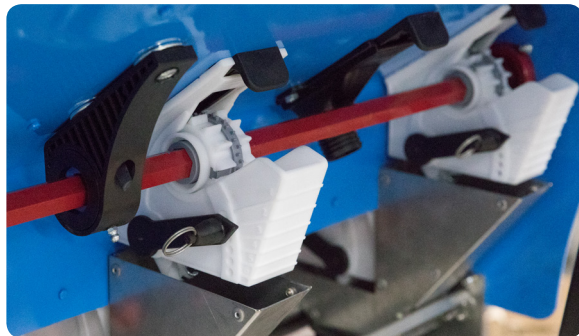

### VINEYARDS COVER CROPS SEEDER BIOSOVY

Equipped with dual box container, allows sowing and fertilizing in the sametime. Flows ratio are settled by double internal variable speed gearbox. Special box shape, and particular configuration with near-vertical adduction pipes, make seeder suitable for all working condition, especially on hilly ground and very step slopes. Peg roller seeder unit with large and small metering wheels for sowing a wide range of seed.

Double variable speed gearbox in the boxes manage mechanical transmission of elements

The feed units are composed by three main parts.

- shock-proof housing
- metering wheels
- seed size setting lever

It's possible changing the space to allows the passage of the request seed quantities in six different positions to avoid excess in sowing. Large funnels make seeds unloading easy without risks of clogging. In the bottom of each box section, there is an hole to permits seeder cleaning at the end of working process.

### TECHNICAL DATA
